TYPICAL RURAL FREEWAY SECTION (with Frontage Roads)

1. For minimum, 9.0 m clearance to obstruction in medians. Width center line to center line of 25.2 m + W is required. W = width of obstruction.

2. Sideslopes in cuts may be exceeded in rock.

3. Additional width required in interchange areas.

4. 3.0 m minimum on six lanes.

5. Median barrier generally used only in medians of 9.0 m or less.

6. A 14.4 m median is appropriate where a future additional lane in each direction is planned.

7. See Table 2-10 and Table 2-14 and discussion in section cross section elements, slopes and ditches, for slope rates.
